

From E-rotica, by Anne Tardos

A Harried Existence

A harried—largely uninformed, though cleverly handled, with great flexibility and good cheer, if a tad inexact, but determined, generous, and sophisticated; even if composed of partly shoddy material that's solidifying with every day that passes, while blindly staying afloat in some way, becoming human, with gusto and abandon, until finally becoming invisible and, in spite of the harrowing circumstances, against all odds, falling in love with a mirage, an image reminiscent of another reality, a means of transport into another world, as real as the one I'm trying to escape from, by entering this other—existence.
